LEATHER FOR EARTH

LEATHER
40075
Leather for earth

**40075 km is the measurement
of the Earth's circumference.**

**This was our starting point for creating
a natural leather with unique features.**

**Leather 40075 represents our relentless pursuit of excellence,
our passion for preserving the essence of the leather and our
commitment to protecting the planet while continuing to do what
we like best. A leather with superior features and a fully certified
natural tanning process in all phases: from procurement of the raw
material right up to the finished product.**

**Leather 40075 is the evolution of vegetable tanning both in
terms of the environment and its versatility and
performance. Are you ready to change?**

Sustainable product by definition: Leather

A process as old as mankind:
tanning with vegetable extracts

This unique manufacturing process combines tradition,
innovation and sustainability

With the warranty of an accredited registered body

LEATHER

Leather for earth

THE INCAS
COMPANY

The **Leather 40075** process was created at a unique, high-tech production company, basing its development on respect for people and the environment.

INCAS

The first tanning company in Europe to receive EMAS Registration.

The first tannery in Italy to obtain ICEC Sustainability Certification in 2014. In accordance with the UNIC Code of Conduct and Social Accountability since 2012.

Leather 40075 is created based on the studies and results achieved with the Hi Co Process (High-Contents), a certified Incas process for the production of metal-free natural leathers. The first and only certified process in Italy by the ICEC back in 2007!

LEATHER 40075 LINE PRODUCTS

The **LEATHER 40075** process involves full-cycle leather processing with **metal-free organic tanning***.

This manufacturing process is used to make the following leathers:

VEAL

CALF

BUFFALO

from the **AQUA** and **TERRA**

lines intended for:

FOOTWEAR

LEATHER GOODS

GARNMENTS

Items intended for the production of high-quality products appreciated by the biggest brands around the world.

**IMPORTANT
Metal free leather as defined by the European standard EN 15987 "Leather-Terminology-Key definitions for the leather trade".*

INCAS

DISTINCTIVE FEATURES OF THE PROCESS

METAL-FREE ORGANIC TANNING: EN 15987 “LEATHER-TERMINOLOGY-KEY DEFINITIONS FOR THE LEATHER TRADE”

(Tanning Metals Cr, Al, Ti, Zr, Fe less than or equal to 0.1%)

All the wet and finishing processing phases are carried out with products and procedures in order to ensure compliance with the “metal-free” definition: tanning is performed with synthetic and natural tanning agents, whose total tanning metal content (Cr, Al, Ti, Zr, Fe) is less than or equal to 0.1% according to the provisions of European standard EN155987 “Leather-terminology-Key definitions for the leather trade”.

WE RECOVER OUR HIDES FROM THE FOOD CHAIN - ETHICAL CLAIM

INCAS has officially adopted the ethical claim “We recover our hides from the food chain”, granted by the ICEC according to the ICEC TS 733 document.

This certification can be applied to a special system of products (finished and semi-finished leathers) made from raw materials with verified traceability: the purpose is to make it verifiable, through ICEC controls, that the raw hide is a by-product of the food chain and is therefore a recovered product.

ORIGIN MARKING OF FINISHED LEATHERS:

Our leathers are entirely produced in Italy with the certified origin marking “Leather from Italy FULL CYCLE” in accordance with standard UNI EN 16484.

ENVIRONMENTAL FEATURES OF THE PROCESS:

- a 53.7% saving of water in the liming process
- a 32.5% saving of sodium sulphide in the liming process
- leather produced in factories certified both under ISO 14001 and EMAS Registration
- when procuring vegetable tannins, priority is given to tannins from FSC-certified timber (Forest Stewardship Council) for proper forest management.
- 100% of electricity used from renewable sources
- Obtaining EMAS certification, with which the company sets its goals for continuous improvement
- In accordance with international standard ISO14001, INCAS has an active environmental management system integrated with the ISO14001 management system and compliant with European Regulation No. 12221/2009 (EMAS).

CERTIFICATIONS

The certifications obtained over the years demonstrate INCAS' commitment to integrity, legality, sustainability, and social responsibility, as well as the high level of professionalism applied to its production processes.

INCAS management system is integrated for quality, safety, and environment and is certified by a third-party organization according to ISO standards 9001, 45001, and 14001.
